TECHNICAL PROJECTS & PROFESSIONAL EXPERIENCE

System Administrator | HeadleyLab | New Waterford, OH | May 2026 - present

Built and maintain a small-business-style IT environment integrating physical, virtualized, cloud, and network infrastructure for hands-on systems administration, security, troubleshooting, and technical support.

- Administer Windows Server, Active Directory, Windows 11, Linux, Hyper-V, SQL Server, Microsoft 365, Exchange Online, Entra ID, and SharePoint.
- Configure and troubleshoot DNS, DHCP, VLANs, routing, switching, Wi-Fi, firewall rules, network segmentation, and remote connectivity.
- Manage user accounts, groups, permissions, file shares, network printing, backups, shared mailboxes, and other business IT services.
- Use PowerShell, SSH, packet captures, system logs, and network utilities to diagnose and resolve hardware, operating system, application, and connectivity issues.
- Document projects, configurations, troubleshooting procedures, technical findings, and completed certifications at HeadleyLab.com.

Operator | SH Bell CO | East Liverpool, OH | February 2021 - August 2026

Operated heavy equipment, including front-end loaders, excavators, and cranes, while safely loading approximately 40–60 trucks per day. Managed multiple truck scales, processed and verified roughly 100–180 vehicle weights daily, maintained shipping documentation, and ensured compliance with legal truck-weight requirements.

Truck Manager | KHB Lonestar | Wintersville, OH | May 2019 - February 2021

Directed field operations supporting approximately 100 employees, supervised 3 truck pushers, and coordinated a fleet of approximately 25 trucks. Trained employees, maintained safety and standard operating procedure compliance, and managed fleet logistics to support efficient daily operations.

Supervisor | JRGO Energy Services | Bulger, PA | December 2016 - May 2019

Supervised and trained crews of 4–10 employees, maintained operational records and safe work practices, and coordinated with multiple companies performing different scopes of work at the same job site to complete projects efficiently.

Installed equipment, communicated directly with customers on behalf of the company, troubleshoot issues, and implemented corrective actions to mitigate problems and minimize downtime.
